Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/751,289	Applicant(s) HOSSAINY ET AL.	
	Examiner Casey Hagopian	Art Unit 1615	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 July 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 39,40,42-50 and 65-67 is/are pending in the application.
- 4a) Of the above claim(s) 39,40 and 42-50 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 65-67 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Art Unit: 1615

DETAILED ACTION

Receipt is acknowledged of applicant's Amendment/Remarks and Terminal Disclaimers filed 7/23/2007.

Claims 39, 40, 42-50, 65-67 are currently pending. Claims 39, 40, 42-50 have been withdrawn. Claims 65-67 are currently under consideration.

Terminal Disclaimer

The terminal disclaimers filed on 7/23/2007 disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date of USPN's 6,790,228 and 6,908,624 have been reviewed and are accepted. The terminal disclaimers have been recorded. Accordingly, the Double Patenting rejections over USPN's 6,790,228 and 6,908,624 have been withdrawn.

Response to Arguments

Applicant's amendment to claim 65 renders the rejection under 35 USC 102 in view of Reich et al. moot. Therefore, the rejection of claims 65 and 67 under 35 USC 102 has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Michal et al. (USPN 6,287,285 B1), Michal (US 2002/0120326 A1), and Davila et al. (US 2002/0111590 A1).

NEW REJECTIONS

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 65 and 67 are rejected under 35 U.S.C. 102(e) as being anticipated by Michal et al. (USPN 6,287,285 B1).

Michal '285 teaches an intracorporeal medical device comprising a polymerized base coat on the device and a top coat on the base coat, wherein the top coat comprises a grafting component and a binding component, said grafting component is selected from the group consisting of vinyl, acrylate and allyl compounds and wherein the top coat comprises a therapeutic, diagnostic, or hydrophilic agent, or a complex of a therapeutic, diagnostic or hydrophilic agent and a linking agent (claim 1). Claim 3 discloses polymers as the hydrophilic agent and claim 14 discloses particular devices including stents. Thus, the teachings of Michal '285 render the instant claims anticipated.

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in

Art Unit: 1615

the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Claims 65 and 67 are rejected under 35 U.S.C. 102(e) as being anticipated by Michal (US 2002/0120326 A1).

Michal 2 teaches a drug delivery system comprising a tubular main body, a biodegradable coating that overlays the tubular main body, one or more drugs that are incorporated in the biodegradable coating and a coating comprising one or more copolymers of ethylene with a carboxylic acid moiety that overlays the biodegradable coating and a primer (claims 34 and 36). Michal 2 also teaches stents and that particular polymers, poly(ethylene-acrylic acid), poly(ethylene vinyl acetate), etc. (paragraph 0025). Thus, the teachings of Michal 2 render the instant claims anticipated.

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Claims 65 and 67 are rejected under 35 U.S.C. 102(e) as being anticipated by Davila et al. (US 2002/0111590 A1).

Art Unit: 1615

Davila teaches medical devices including stents comprising a coating, the coating comprising a primer composed of a polymer of vinylidene fluoride and hexafluoropropylene (e.g., an unsaturated polymer) and a topcoat comprising a polymer and a therapeutic agent (paragraphs 0028-0029). Thus, the teachings of Davila render the instant claims anticipated.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 65 and 67 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 3 and 14 of U.S.

Patent No. 6,287,285 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because both the patent and the application claim

Art Unit: 1615

implantable medical devices including stents comprising a primer coat and a top coat, the primer coat can contain an acrylate and the top coat can contain a polymer and a drug. Thus, the claims are coextensive in scope.

Claims 65-67 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 2 and 5 of copending Application No. 11/506,656. Although the conflicting claims are not identical, they are not patentably distinct from each other because both applications claim implantable medical devices comprising a reservoir layer comprising a polymer and a drug and a primer layer free from any drugs comprising a material such as unsaturated polymers, high amine content polymers, acrylates, polymers containing a high content of hydrogen bonding groups, inorganic polymers. Both applications also claim the particular unsaturated polymers, polyester diacrylates, polycaprolactone diacrylates, polytetramethylene glycol diacrylate, polyacrylates with at least two acrylate groups, polyacrylated polyurethanes, triacrylates, and any combination thereof as well as the particular implantable medical device, a stent. Claim 1 of the copending application is slightly broader in scope and encompasses the subject matter claimed in claim 65 of the instant application. A species always anticipates a genus. Thus, the claims are coextensive in scope.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Art Unit: 1615

Applicant is reminded that “the individuals covered by 37 CFR 1.56 have a duty to bring to the attention of the examiner, or other Office official involved with the examination of a particular application, information within their knowledge as to other copending United States applications which are 'material to patentability' of the application in question” (see MPEP 2001.06(b)). Similarly, the prior art references from one application must be made of record in another subsequent application if such prior art references are “material to patentability” of the subsequent application (MPEP 2004, paragraph 9).

Allowable Subject Matter

Claim 66 appears to be free of the art. Once the Double Patenting rejection is resolved and pending a patentability conference, the claim may be deemed allowable.

Conclusion

Claims 65-67 have been rejected; no claims are allowed.

Correspondence

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Casey Hagopian whose telephone number is 571-272-6097. The examiner can normally be reached on Monday through Friday from 7:00 am to 4:00 pm.

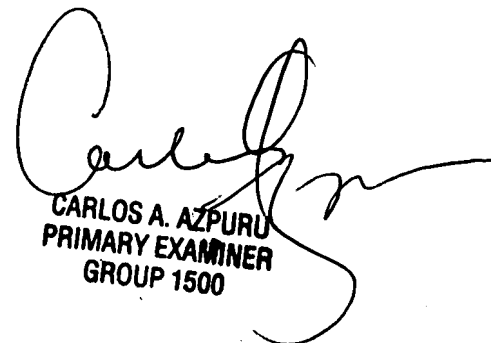

Art Unit: 1615

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carlos Azpuru, can be reached at 571-272-0588. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
